SYSTEMS & CONTROL LETTERS

Author Index Volume 29 (1997)

(The issue number is given in front of page numbers)

Albertini, F. and **D. D'Alessandro,** Asymptotic stability of continuous-time systems with saturation nonlinearities (3) 175–180

Barabanov, A.E. and **A.M. Ghulchak,** H^∞ optimization problem with sign-indefinite quadratic form (3) 157–164
Barros, C.J.B. and **L.A.B. San Martin,** On the number of control sets on projective spaces (1) 21– 26
Bernstein, D.S., see W.M. Haddad (4) 197–205
Besançon, G. and **H. Hammouri,** On uniform observation of nonuniformly observable systems (1) 9– 19
Bloch, A. and **S. Drakunov,** Stabilization and tracking in the nonholonomic integrator via sliding modes (2) 91– 99
Borkar, V.S., Stochastic approximation with two time scales (5) 291–294
Braslavsky, J., G. Meinsma, R. Middleton and **J. Freudenberg,** On a key sampling formula relating the Laplace and $\mathscr{Z}$ transforms (4) 181–190

Chellaboina, V.-S., see W.M. Haddad (4) 197–205
Chmielewski, D. and **V. Manousiouthakis,** On constrained infinite-time linear quadratic optimal control (3) 121–129

D'Alessandro, D., see F. Albertini (3) 175–180
Drakunov, S., see A. Bloch (2) 91– 99

Evans, R.J., see A.V. Savkin (2) 81– 90

Freudenberg, J., see J. Braslavsky (4) 181–190
Fridman, E. and **U. Shaked,** On regional nonlinear H^∞-filtering (4) 233–240
Funahashi, Y., see T. Ooba (4) 191–196

Ghulchak, A.M., see A.E. Barabanov (3) 157–164

Haddad, W.M., V.-S. Chellaboina and **D.S. Bernstein,** An implicit small gain condition and an upper bound for the real structured singular value (4) 197–205
Hammouri, H., see G. Besançon (1) 9– 19
Helton, J.W. and **M.R. James,** On the stability of the information state system (2) 61– 72
Hernández-Hernández, D. and **S.I. Marcus,** Risk sensitive control of Markov processes in countable state space (3) 147–155
Hirata, K., see Y. Yamamoto (2) 111–117
Hmamed, A. and **E. Tissir,** Comments on "Delay independent robust stability of uncertain linear systems" (2) 119–120

Imura, J.-i. and **T. Yoshikawa,** Parametrization of all stabilizing controllers of nonlinear systems (4) 207–213

James, M.R., see J.W. Helton (2) 61– 72
Jiang, D.-c. and **J.B. Moore,** Least squares pole assignment by memoryless output feedback (1) 31– 42

Kimura, H., see P.H. Lee (1) 1– 7
Kreisselmeier, G., Stabilization of linear systems in the presence of output measurement saturation (1) 27– 30

Lam, J. and **W.-Y. Yan,** Pole assignment with optimal spectral conditioning (5) 241–253
Lee, P.H., H. Kimura and **Y.C. Soh,** On the lossless and J-lossless embedding theorems in H^∞ (1) 1– 7
Lin, W., Further results on global stabilization of discrete nonlinear systems (1) 51– 59
Lin, W., Time-varying feedback control of nonaffine nonlinear systems without drift (2) 101–110
Lin, Z., Robust semi-global stabilization of linear systems with imperfect actuators (4) 215–221
Lomadze, V., Linear system theory: An algebraist's point of view (2) 73– 79

Manousiouthakis, V., see D. Chmielewski (3) 121–129
Marcus, S.I., see D. Hernández-Hernández (3) 147–155
Meinsma, G., see J. Braslavsky (4) 181–190
Middleton, R., see J. Braslavsky (4) 181–190
Mirkin, L. and **H. Rotstein,** On the characterization of sampled-data controllers in the lifted domain (5) 269–277
Moore, J.B., see D.-c. Jiang (1) 31– 42

Nešić, D., A note on dead-beat controllability of generalised Hammerstein systems (4) 223–231

Ooba, T. and **Y. Funahashi,** Stability robustness for linear state space models – a Lyapunov mapping approach (4) 191–196

Elsevier Science B.V.

Petersen, I.R., see A.V. Savkin (2) 81– 90

Rotstein, H., see L. Mirkin (5) 269–277

San Martin, L.A.B., see C.J.B. Barros (1) 21– 26
Savkin, A.V., I.R. Petersen, E. Skafidas and **R.J. Evans**, Hybrid dynamical systems: robust control synthesis problems (2) 81– 90
Shaked, U., see E. Fridman (4) 233–240
Siciliano, B. and **L. Villani**, An output feedback parallel force/position regulator for a robot manipulator in contact with a compliant environment (5) 295–300
Skafidas, E., see A.V. Savkin (2) 81– 90
Sluis, W.M. and **D.M. Tilbury**, A bound on the number of integrators needed to linearize a control system (1) 43– 50
Soh, Y.C., see P.H. Lee (1) 1– 7
Sontag, E.D. and **Y. Wang**, Output-to-state stability and detectability of nonlinear systems (5) 279–290
Staffans, O.J., On the discrete and continuous time infinite-dimensional algebraic Riccati equations (3) 131–138

Tannenbaum, A., see Y. Yamamoto (2) 111–117
Tao, G., Inherent robustness of MRAC schemes (3) 165–173
Tilbury, D.M., see W.M. Sluis (1) 43– 50
Tissir, E., see A. Hmamed (2) 119–120

Villani, L., see B. Siciliano (5) 295–300

Wang, Y., see E.D. Sontag (5) 279–290

Xie, L., see S. Xie (5) 255–268
Xie, S. and **L. Xie**, Robust dissipative control for linear systems with dissipative uncertainty and nonlinear perturbation (5) 255–268

Yamamoto, Y., K. Hirata and **A. Tannenbaum**, Some remarks on Hamiltonians and the infinite-dimensional one block H^∞ problem (2) 111–117
Yan, W.-Y., see J. Lam (5) 241–253
Yoshikawa, T., see J.-i. Imura (4) 207–213
